

"New PPG Lead Appointed at Ashlea Medical Practice

We are pleased to announce that Dr Philippa Williams has taken on the role of PPG Lead for the Ashlea Medical Practice partnership, succeeding Dr Yacob, who has stepped down after six years of dedicated service in the position. We would like to thank Dr Yacob for her commitment and contribution to strengthening patient engagement during her time as PPG Lead.

Dr Williams is well known to many patients through her wide-ranging work within the practice. Alongside her specialist interests in diabetes, mental health and substance misuse, she serves as a clinical supervisor for GP registrars and medical students. She is also a Trustee of the Friends of Ashlea Medical Practice charity.

In her new role as PPG Lead, Dr Williams will help maintain the strong partnership between the practice and the Patient Participation Group, supporting open communication and ensuring that patients' voices continue to be heard by AMP through the PPG. This reflects AMP's ongoing commitment to delivering safe, effective and patient-centred care."
